**4. Ask on IRC**

**+**

**5. Send an e-mail**

**English** is the accepted language in the business world, and in the Industry.

If your English reading and comprehension skills are weak, get help!

Language

# Reading Comprehension

Writing

- Bad grammar is acceptable.
- Atleast do a spell-check.

Spoken

Every weekend  
have a  
**one-to-one**  
**chat discussion**  
with your mentor(s).

Mentor(s), who work, are busy during weekdays.

**Don't disturb** them during weekdays, unless it is urgent.

Just send  
e-mail

**during weekdays.**

If your English is weak, don't explain the error!

By trying to explain it in your own words, you only make it worse!

Just copy and paste the **output/error** or **log** messages.

Not being **on time** is  
unprofessional,  
rude,  
awful!

Punctuality is important.

Time is precious!

As on date, you cannot undo time!

If you are not able to make it to  
the online discussion with your  
mentor(s),

**inform!**

Mentor(s) can get to do their work  
rather than wait for you!

When asking a question  
in writing, put a  
**question mark**  
at the end.

How does anyone know if you are  
making a statement or asking a  
question ?

# Doing the project

...

Understand what mentor(s) can do ...

Mentor(s) **CANNOT**

- write project abstracts,
- write code,
- do project documentation,
- prepare presentations,  
... for you.

Mentor(s) can only tell you what to do.

Start with **small** tasks to  
assess your progress,  
before you handle **big**  
project tasks.

Patience is the key to success.

Send status  
updates on daily  
basis!

Never ever do  
**last minute work!**

**curve !**  
**learning**  
**a steep**  
**through**  
**going**  
**You are**

# Communicate like an engineer!

Always give detailed info when posting a problem or asking a question.

Don't give **blunt** information like:

**“Internet is not working”.**

**“I have compilation problem”.**

# Communicate like an engineer!

## **“Internet is not working”.**

- What is the network setup?
- What did you try?
- How do you say it is not working?
- Which GNU/Linux distribution?

# Communicate like an engineer!

## **“I have compilation problem”.**

- What source code?
- How did you compile?
- Which compiler?
- Where is the error output?
- Which GNU/Linux distribution?

Keep journal/log of:

- **daily activities,**
- **e-mail correspondences,**
- **problems solved,**
- **HOWTOs/reference links.**

Helps in project documentation.

When you reply to e-mail or questions, reply to all the questions asked.

**Don't skip** anything!

Same when following HOWTOs, documentation, tutorials et. al.

Over-enthusiasm can cause you to make your own decisions.

**Never make your own project decisions!**

Else, why do you need mentor(s)?

Always inform your team members, or consult your mentor(s) before doing anything new.

When sending e-mails while working with team members,  
**don't forget to CC**  
all your team members.

If you intentionally/unintentionally forget to CC, your team will lose trust in you!

Else, use a project mailing list.

If you keep  
**repeating**  
**the same mistakes**  
again, and again, and again,  
expect the mentor(s) to find  
other developers.

It is normal for people to move in,  
and out of project teams.

Can my  
friend(s) also  
**join**  
the project?

Only if they get selected by the mentor(s).

**Never ask personal  
questions  
to your mentor(s).**

It is none of your business.

Respect other peoples' privacy.

Write small code first, and send it to your mentor(s) for feedback.

Easy to **correct small mistakes** on daily basis, than to submit a chunk at the end of the week, and re-do everything.

PITA.

**Never make  
assumptions.**

Always give proof when you  
make statements.

**Never hesitate** to ask questions.

If in doubt, ask.

No harm in making sure you have understood.

Being silent gives the impression that you have understood.

Feel free to have open discussions with your mentor(s).

The more you hesitate, lesser the communication, more the communication gap, and project at stake!

## Other Actions

## Welcome

Thank you for visiting Red Hat Bugzilla. Red Hat Bugzilla is the Red Hat bug-tracking system and is used to submit and review defects that have been found in Red Hat distributions. Red Hat Bugzilla is not an avenue for technical assistance or support, but simply a bug tracking system. If you submit a defect, please provide detailed information in your submission after you have queried Red Hat Bugzilla to ensure the defect has not been reported yet. Defects will go directly to the engineer responsible for the component you filed the defect against. Engineers have many responsibilities and will get to your defect in due time.

If you are a Red Hat Enterprise Linux customer and have an active support entitlement, please log in to [Red Hat Support](#) for assistance with your issue. If you are a Fedora Project user and require assistance, please consider using one of the [mailing lists](#) we host for the Fedora Project.

You may also find answers to many issues in the [Red Hat Knowledgebase](#) or you may also connect with the Red Hat community to find technical answers through [Red Hat Technical Mailing Lists](#).

Please use the correct channels for support so that your issue can be resolved in a prompt and timely manner. Thank you for choosing Red Hat.

# Track and shoot Fedora bugs!

# BugZappers

## *Bug Triaging*

- Bug reports have the information developers need to reproduce and fix them.
- Bugs are assigned to the right component and version.
- Duplicate bugs are found and labelled.
- Feature requests reported as bugs are properly reported.
- Bugs already fixed are closed.

# Documentation

<https://fedoraproject.org/wiki/DocsProject>

- 100% Free/Libre open content, services and tools for documentation.
- Project Workflow:  
<https://fedoraproject.org/wiki/DocsProject/WorkFlow>
- Wiki – Writing/Drafting.
- Docbook:  
<http://doc-book.sourceforge.net/homepage/>
- Translation work.

# Infrastructure

<https://fedoraproject.org/wiki/Infrastructure>  
fedora-infrastructure-list@redhat.com  
#fedora-admin (irc.freenode.net)

- Infrastructure team provides servers, tool and utilities for the Fedora project.
- System administrators/developers - administer and maintain Fedora infrastructure and systems.
- Getting started:  
<https://fedoraproject.org/wiki/Infrastructure/GettingStarted>
- Architecture:  
<https://fedoraproject.org/wiki/Infrastructure/Architecture>

# Internationalization

<https://fedoraproject.org/wiki/I18N>  
fedora-i18n-list@redhat.com, fedora-i18n-bugs@redhat.com  
#fedora-i18n (irc.freenode.net)

- Develop, package, and maintain applications like input methods for different languages.
- Improve applications and utilities to support and process different languages.
- Quality-assure that existing applications meet i18n standards.
- Support the infrastructure of the Fedora translation community.

# Localization

<https://fedoraproject.org/wiki/L10N>  
fedora-trans-list@redhat.com  
#fedora-l10n (irc.freenode.net)

- Fedora (software, documentation, websites and culture) to local communities. Not limited to translation of PO files.
- DocsProject/Translation:  
<https://fedoraproject.org/wiki/DocsProject/Translation>
- Translation quick start guide:  
<http://docs.fedoraproject.org/translation-quick-start-guide/>
- Language list:  
<http://translate.fedoraproject.org/languages>

# Marketing

<https://fedoraproject.org/wiki/Marketing>  
fedora-marketing-list@redhat.com  
#fedora-mktg (irc.freenode.net)

- Marketing strategies to promote the usage and support of Fedora worldwide.
- Work with Fedora Ambassadors.
- Dispel myths.
- Communicate with press, user groups.

# Package Maintainers

<https://fedoraproject.org/wiki/PackageMaintainers>  
fedora-devel-list@redhat.com, fedora-devel-announce@redhat.com
